

Environmental Policy Statement

Elite Recycling Solutions Ltd offers economic and progressive Waste and Recycling Solutions to Industrial and Commercial Clients, aimed at minimising the impact on the environment. We work to deliver our Integrated Waste Management Solutions by maximising any recycling potential. We adhere to the Waste Hierarchy to provide our clients with the best solutions for their waste.

To achieve this, Elite is committed to working with our partners and stakeholders in conjunction with our Suppliers and Customers in promoting environmental performance. Recognising this concern for the environment we therefore aim to minimise the environmental impact of our activities, products and services. It is our policy to ensure that all aspects of our business have the least harmful impact upon the environment.

We have the following approach to promote good environmental practices:

- ✓ **We comply with all relevant legislation and regulation** relating to our activities and their environmental impact. We operate in full compliance with applicable legal and other requirements, working to achieve and maintain ISO 14001 certification.
- ✓ **Promote Environmental awareness throughout the organisation** by controlling and managing our operational activities and products ensuring risks to the environment are identified and actions taken to minimise or eliminate their effects.
- ✓ **Ensure Suppliers and contractors understand the Company Policy** and to assist them in a responsible approach towards environmental issues.
- ✓ **Maintain a safe and healthy working environment for employees.** Encouraging all staff to recognise their environmental responsibilities and providing appropriate environmental training where needed.
- ✓ **To strive for continual improvement in overall environmental performance.** Assessing and monitoring our impact upon the environment.
- ✓ **Reduce energy use** by managing our use of utilities and developing our use of electronic communication to reduce the need of printing paper.
- ✓ **Reduce Waste.** Reduction of waste to landfill by maximising the potential to reclaim, recycle and recover materials for their energy content. Ensuring any remaining waste is disposed of in compliance with the law.
- ✓ **Recover, Recycle and Re-use** waste materials wherever practicable.
- ✓ **Increase source materials for Recycling.**
- ✓ **Prevent Pollution.** Meeting our Duty of Care requirements. Employing the best techniques and procedures for the safe handling, transportation, storage, treatment and processing and disposal of any wastes that may be harmful to the environment.
